

IDENTIFYING ENTITIES, ATTRIBUTES, PRIMARY KEYS, AND RELATIONSHIPS

CHAPTER – 2

Meesho Women's Fashion Database Management System

Description

In this phase of the project, the entities, attributes, primary keys, foreign keys, and relationships required for the Meesho Women's Fashion Database Management System were identified. These components form the foundation of the database and help organize data efficiently. A well-designed relational database ensures data consistency, reduces redundancy, and supports the smooth operation of the Meesho women's fashion platform.
